

# Part-Circle R2000WF/LP Rotator® Sprinklers

The PC-R2000WF is a Part-Circle Rotator that distributes water in a 180 degree arc. It is intended to irrigate the edge of a field where full circle Rotators are used in the interior.

PC-R2000WF PN 10242-1xxx  
PC-R2000LP PN 11296-1xxx

**PC-R2000WF FEATURES:**

- Easier to install and more durable Road Guard
- All orange color easily distinguishes the part circle model from full circle sprinklers in the field.
- Improved uniformity over all other Road Guard models allows more precise nozzle size selection because:
  1. Water is more evenly distributed along the edges of the watering area.
  2. No diffuser and improved Road Guard reduces over watered areas.

To reduce overwatering select a nozzle size for the PC-R2000WF that is between 65 and 75% of the flow of the full circle Rotators. See selection chart below.
